DETAILED ACTION

Response to Amendment

1. The indicated allowability of claim 34 is withdrawn in view of previously cited reference to Uematsu et al. Rejections based on the cited reference(s) follow.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 16 and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 16, line 6, the element "channel frame" in line 3 is not described in the specification, thus, the element is a new matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 2663

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 34 is rejected under 35 U.S.C. 102(e) as being anticipated by Uematsu et al (U.S. Patent No. 5,751,720).

Uematsu et al discloses an apparatus comprising

a pointer processing section (11 and 27 in FIG. 11) for processing a pointer contained in a transmission frame; and

a frame identification section (21-26 in FIG. 11) for identifying a frame size of the transmission frame based on pointer processing result of the pointer processing section and providing such identification result to the pointer processing section.

See col. 6, line 29-col. 9, line 6.

Allowable Subject Matter

5. Claims 17-23 and 25-33 are allowed.
6. Claims 16 and 24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
